Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Stigar-Brown (6,056,705).

Claims 1 and 2 - element -36- is a vibrator means, arm elements -18- and -24- are a clip means. Arm elements -18- and -24- are spring biased. The device is capable of being clipped to the labia.

Claim 3 - the examiner is taking element -28- as a curved plate with a first end on the inside adjacent the vibrating element -36- and a second end on the outside adjacent the arms -18- and -24-.

Claims 4 and 5 - element -36- is a vibrator means, element -34- includes a recess for holding the vibrating means, and recess arm elements -18- and -24- are a clip means. Arm elements -18- and -24- are spring biased. The device is capable of being clipped to the labia.

Claim 6 - the examiner is taking element -28- as a curved plate with a first end on the inside adjacent the vibrating element -36- and a second end on the outside adjacent the arms -18- and -24-.

Claims 1, 2, 4, and 5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Micro-Vibe (page 11, Adam & Eve catalog from 11/29/2001).

The Micro-Vibe includes a set of clips including spring biased arms connected to vibrators. The clips are capable of being used on the labia.

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Klein(2003/0181784).

Applicant's attention is invited to the embodiment of figures 9-11, elements -41- and -45- are clip arms, element -12- is a vibrator, element -47- is a curved portion, and housing -11- is a holder.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents 6,685,660 and 6,053,881 teach related vibratory devices.
